Chief's Chat,

As spring approaches and the weather gets warmer, we always experience a seasonal increase in calls for service and overall activity.

To Reduce the Risk of Burglary, here are a few tips to help you secure your home:

- All outside doors should be made of solid wood or metal construction.
- Replace worn out window hardware such as latches, locks, screws, and pins.
- All outside doors and inside garage doors should have at least one-inch deadbolt locks.
- Strike plates should be affixed to the door frame with minimum of two fully threaded 3-inch screws.
- All entry points should be illuminated and clear of obstruction.
- Keep valuables out of sight from windows.
- Keep porch and outdoor lights on all night.

As a friendly reminder, please keep your grass and weeds under seven (7) inches, and your property clear of junk, trash, and/or debris to ensure you are not issued a codes citation.

Chief of Police

NATIONAL WEATHER SERVICE

Tornado Safety

Tornado Watch – Issued when conditions for tornado development. People located in and around the watch area should be weather aware and listen to their NOAA weather radio or local broadcast media for further weather information. A “Tornado Watch” is intended to give you time to prepare and time to review your safety rules.

Tornado Warning – Issued when a developing tornado has been detected by National Weather Service (NWS) Doppler radar or a reliable report of a tornado has been reported. The tornado warning is usually issued for portions of one or two counties, for an hour or less. The storm could also produce large hail and destructive straight-line winds. If the tornado warning includes your neighborhood or workplace, seek shelter immediately.

In the event of a tornado, here are some tornado safety rules to help keep you and your family safe;

- In general, get as low as you can. A basement below ground level or the lowest level of a building offers the best protection. Put as many walls between yourself and the outside as possible. Avoid windows.
- Tornadoes could be obstructed by rainfall or come at night. Do not wait until you see or hear the tornado. It may be too late.
- In homes or public buildings, go to the basement or a small interior room, such as a closet, bathroom or interior hallway on the lowest level. Close all doors to the hallway for greater protection. Protect yourself from flying debris with pillows, heavy coats, blankets or quilts.
- **Don't** stay in a mobile home during a tornado. Mobile homes can turn over during strong winds. Go to a nearby building, preferably one with a basement. If there is no time to get to a shelter, lie flat in the nearest ditch, ravine, or low spot. Lie flat, covering your head with your hands for protection.
- In vehicles or outdoors; when tornadoes are possible, stay close to a sturdy shelter. If caught outside, find shelter in a ditch or remain in your vehicle and cover your head for protection. Do not take shelter under a highway overpass, where wind speeds can increase due to a tunneling effect. It is best to not put yourself or others in a situation where no sturdy shelter is available
- Remember, stay away from doors, windows, outside walls and protect your head.

April 2024 Park News

Spring is here in full force. Plans are moving along for the annual Day in the Park. It will be Saturday May 4 from 11:00-1:00. **Fun, food, friends** is the name of the game. There is a raffle. Door prizes, plant exchange, games and a few more extras will be offered. We need face painters, people to supervise the sack race, bouncy house, prizes, food distribution. Hanson Park is your park and so would love to see more citizens involved.

We are developing a survey for feedback in what you want for our parks in the way of improvements, etc. This will help guide the board as it writes a Master Plan for now and into the future. Would welcome people who have experience in developing Master Plans and how to search and apply for grants.

The board has now provided a way that people can donate online. Playground equipment, plants, events and maintenance are very expensive. It would help if the park had donated funds to provide even more amenities.

The proposed 135,000 square foot building would cost approximately \$80 million to build. The other three finalist sites are in Kansas City, Missouri and building costs would likely be higher for those sites. The backup plan is the Pleasant Valley site is not chosen remains an apartment building. No changes are planned for the site until a final plan is confirmed.
